

Website—Student Evidence

Digital Technologies AS91370 (2.43):

Implement advanced procedures to produce a specified digital media outcome

Student Name:

1. (a) Create a simple layout in Word/Publisher/Pencil or another program showing the placement of the major elements of your page. Put a screenshot of your layout in the space below:

(b) Create a site map in Visio. Add a copy of your site map here:

2. Take photographs for your website. Grab a screenshot when you transfer your images from your camera to your computer and put it below:

3. Complete the table below detailing some of the skills you used to create your images. One has been done for you as an example. (**Note: at least two skills!**)

Skill	Steps	Screenshot
cropping an image	Open the image in FireWorks Select the area to be cropped with the Crop Tool Double click inside the box or press Enter Note: this is not a Level 2 skill	

4. Save your images in an appropriate format. Remember to reduce the file size / quality. Take a screenshot of the 'Save' dialog box to show you have optimised one of your images.
5. Copy and paste (or screenshot) the .html from one of your pages below. Choose a section of .html which shows commenting and appropriate indentation.
6. Copy and paste (or screenshot) a portion of your .css below. Choose a section which shows appropriate commenting and indentation.
7. Screenshot the "success" message from validating your .html

8. Screenshot the “success” message from validating your .css
9. Take a screenshot of one of your pages in Chrome and paste it in the table in part 10 below.
10. Take a screenshots of this page in another browser (eg Mozilla Firefox) and paste it in the table below so that it can be compared.

Chrome	Firefox / Internet Explorer / Safari

Are there any differences between how your page looks in Chrome compared with Firefox / IE / Safari?

If your page looks the same in both, that is perfect. If there are differences comment on them. As long as it looks acceptable in both you don't need to worry.

11. References:

Please use <http://www.bibme.org> to format the sources of information you used in your website. Put your citations (APA format) below.

If all the work on your site is original, please highlight this sentence in yellow.

Note that any information you use from outside sources must be paraphrased (in your own words). You still need to acknowledge where the information is from. If you simply copy and paste you will not achieve this standard!
